

With over a half century of experience in all aspects of construction & over a decade in property development, Walls is one of the most successful and respected in the Irish Construction industry.

“Over the years safety has always been a priority with us, we are constantly looking for new ways to improve our standards. We introduced a safety programme called ‘great catches’ to promote catching observations and hazards on site. Implementing this programme proved difficult for us, until we introduced Senubo. Now we tag the safety issue as a ‘great catch’ and post the details to Senubo. The post can also be supported with a photo. This makes everyone aware of incidents as they happen and initiates a solution straight away. The move to Senubo has been a very positive one for the company because it helps us to improve safety on site in real time.”

Adrian Corcoran
Const. Director
Walls

Customer Success Story; A safety perspective.

SENUBO

real time from the front line

SENUBO is an online platform which allows company networks and groups to communicate centrally using any device. Knowledge workers across multiple locations collaborate and respond in real time.

THE CHALLENGE...

- To promote all aspects of safety across the company, on all projects and on all sites;
- To record Incidents in total as they happen;
- To create and report all HSEQ issues promptly;
- To distribute reports to relevant people;
- Keep a site diary, in real-time with visual supports ;(photos, docs and drawings)
- To get behind and bolster our ‘great catches’ programme.

...THE SOLUTION

- To provide a common space for employees to log, report and discuss safety issues in a timely fashion;
- Provide the ability to produce reports and analytics and distribute them to the relevant parties;
- We can now include sub teams and even non Senubo members;
- Promote the ‘great catches’ programme;
- Provide the ability to export data so a site diary can be maintained.

THE DIFFERENCE ...

- **Highlights safety issues in real time:** SENUBO provides us with the common platform needed to highlight and discuss safety issues as they occur in real time;
- **Implements the Walls ‘great catches’ programme:** and as the same time educate our work force;
- **Everyone is engaged :** We can engage everybody in capturing, reporting & resolving safety issues on site even if they are not members be sending a simple text message;
- **Information exchange:** Managers receive information they need and express their approval by ‘liking’ an action;
- **No spend on new ICT;** Senubo empowers our existing team with existing hardware to make improvements themselves.
